13 APR 1961

MEMORANDUM FOR THE SECRETARY OF DEFENSE

Subject: Limited War Training Exercises (U)

1. In a memorandum for the Chairman, Joint Chiefs of Staff, on 8 March 1961, subject: "Assignment of Projects Within the Department of Defense," you assigned a project to prepare a detailed program for limited war training exercises.
2. The scope, characteristics and duration of limited war cannot be predicted precisely but may be visualized as varying in size and intensity. It may or may not include employment of nuclear weapons. Normally the forces required to satisfactorily conclude a limited war will involve more than one Service and will be assigned to a joint commander or a commander of a unified or specified command. Therefore it is considered that advanced training exercises involving joint or combined forces are most representative of training for limited war. Preliminary or small unit training is conducted by Service components.
3. Training for limited war is a function of the commanders of the unified and specified commands and the Services. Guidance to the Services to organize, train, and equip forces for combat operations and guidance to commanders of unified and specified commands and the Services for operations and training of unified, specified, joint task force and other joint force commands has been provided by the Joint Chiefs of Staff in JCS Publication No. 2, Unified Action Armed Forces, November 1959. The responsibilities, functions and authorities contained in the publication were provided on the basis of applicable laws, directives, policies and procedures as promulgated by Congress, the President and the Secretary of Defense.
4. The extent to which forces should be trained in joint training exercises is dependent upon several considerations. The commanders of unified and specified commands are best qualified to determine the optimum joint training that should be scheduled for the forces assigned them. Likewise, the

Services are best qualified to determine the extent to which they can support joint training and mobility exercises with the forces and resources available. The Joint Chiefs of Staff are in the best position to correlate the joint training involved in significant exercises.

5. Each of the Services has an aggregate of specialized schools designed to provide currently indoctrinated officers and men to the combat units. These schools teach the latest doctrines, tactics, concepts and strategies as applicable for the functions and responsibilities assigned their respective Services. Specialized schools and training commands cover aspects of training for operations in the Jungle, Arctic, mountains, desert, over the beaches, etc., and the majority of these schools teach subject matter for joint operations. Additionally, the curricula of the colleges sponsored by the Joint Chiefs of Staff include study of limited war. All of this effort encompasses training for the whole spectrum of war and includes all facets of limited war training.

6. Such factors as availability of funds, availability of logistic support elements, scheduled unit rotations to unified commands, level of unit training, unit equipment changes, estimate of enemy capability, terrain in respective theatre, seasonal weather changes and similar considerations dictate the scope and timing for joint training exercises. Many of these factors pose limitations which are beyond the control of the commander concerned. It is in these instances that the Joint Chiefs of Staff participation in the planning and execution of exercises can best provide the over-all coordination necessary for limited war. It is the inherent responsibility of commanders to conduct appropriate training in preparation to execute their assigned combat missions. The same is true for combat units retained by the Services to be assigned to unified commanders or joint task forces as contingencies arise.

7. The Joint Chiefs of Staff initiate, plan and conduct various command post exercises and readiness tests designed as training for the entire spectrum of war including limited war. These exercises and tests provide realistic training for the Joint Staff and the staffs of the commanders of unified and specified commands and their components. A very significant portion of limited war training is accomplished through combined exercises with international treaty organizations and

by bilateral agreements as recommended and coordinated by the Joint Chiefs of Staff for participation of US forces. In addition the Joint Chiefs of Staff approve, sanction or comment upon significant proposed joint exercises where more than one unified command or Service is involved, secure funding from the Secretary of Defense where applicable, participate when feasible, and provide liaison through the Secretary of Defense to the State Department where political considerations are involved with joint or combined exercises.

8. The current procedure being practiced, wherein the main initiative for programming joint exercises rests with the unified and specified commands in coordination with the Services, has resulted in a well balanced and aggressive training program for limited wars. An example of this is the recent joint exercise to the Philippines, exercise LONG PASS. This exercise involved the airlift of two Army battle groups, accompanied by two tactical fighter squadrons with appropriate supporting forces. In general the program provides one or two such exercises each fiscal year. This program of exercises, is the product of approximately a two year cycle of development planning. In the aggregate, these exercises are considered to provide an effective limited war training program for the period 1 July 1961 to 30 June 1962.

9. In summary the limited war training program consists of plans projected from two to three years coordinated and prepared by the commanders of unified and specified commands and by the Services with due consideration for such factors as force availabilities, state of unit training, and weather and area appropriate to the type of training desired. The Appendix hereto contains the FY-62 significant exercises program which has been scheduled for units of the Army, Navy, Air Force and Marine Corps.
